

PremiraVersa™ Disposable Microfiber Mop Pad

Revolutionary disposable microfiber mop with unmatched coverage and scrubbing power

The PremiraVersa™ Disposable Microfiber Mop Pad represents the next innovation in cleaning technology from Contec Inc, the leaders in disposable microfiber solutions. Engineered for maximum performance and convenience, this mop pad is designed to be compatible with all standard flat mop hardware, making it an easy addition to your cleaning routine.

The PremiraVersa Mop Pad stands out with its thick, absorbent microfiber construction, complemented by two innovative “Scrubberage” lanes. These lanes combine superior coverage with scrubbing power, enabling operators to efficiently tackle even the most stubborn built-on residues on hard surface floors. Ideal for healthcare, the PremiraVersa mop is leading single-use mops with at least 35% more coverage than all other disposables in the market.

The first disposable mop of its kind, the PremiraVersa offers unmatched versatility and performance in any cleaning application.

What is Scrubberage?

Our new Scrubberage technology enables you to do more and go further when you mop. The two Scrubber lanes on the PremiraVersa provide an abrasive yet gentle element so you can effectively remove dirt, grime and contaminants without damaging the surface of your floor. The increased loft means greater surface contact, allowing you to cover more square footage.

Scrubbing plus coverage equals scrubberage.

Features

Delivers similar coverage as its laundered counterpart while avoiding large amounts of chemical waste.

The dual scrub lanes are specifically designed to remove built-on residues.

Compatible with a wide variety of disinfecting and cleaning chemicals.

Covers up to 400 square feet per pad
