

# High Duster XF

## For cleaning hard-to-reach spaces

The High Duster XF by Contec Professional makes cleaning hard-to-reach spaces a breeze. When paired with the Premira® Microfiber High Duster XF Covers, the flexible, three-dimensional design pulls dust and dirt from surfaces with more pressure and less effort. In addition to its distinctive finned design, the body of the tool bends to hug surface contours and reduces operator strain. The High Duster XF can be used as a handheld tool to clean areas within arm’s reach. For overhead surfaces, pair the High Duster XF with your choice of ZeroGravity™ QuickChange handles. It’s ideal for cleaning HVAC ducts and vents, between walls, and around heavy equipment.

**PREMIRA® II MICROFIBER HIGH DUSTER COVERS**  
 Laundry-Free™ Premira® II Microfiber High Duster Covers come in two sizes to fit the High Duster XF and the Standard High Duster. These covers are effective for both dry and damp dusting in hard-to-reach areas. The premium microfiber fabric offers excellent pickup power and is compliant with most cleaning protocols. Once the Laundry-Free™ Premira® High Duster cover is soiled, simply toss it in the trash and grab a new cover.
