ProSights™ 4-step approach

Set your sights on a new level of excellence in EVS with our comprehensive assessment program. Designed to optimize cleanliness, safety, and efficiency within your facility using your standards and protocols, our 4-step approach ensures your environment promotes the well-being of patients and staff alike.

Step One Identifying excellence

1

We begin by identifying the essential skills, tasks, and conditions to audit within your healthcare facility.

Our team of technical support specialists collaborates with you to understand your specific requirements, taking into account facility guidelines, industry best practices, and your unique needs. By tailoring the assessment to your facility, we lay the foundation for a customized evaluation that addresses the critical aspects of your environment.

Step Two Observing practices and processes

2

In this crucial step, our skilled technical support specialists conduct a comprehensive assessment of how your EVS team performs their essential duties.

Utilizing digital technology and specialized techniques, we evaluate cleaning procedures, infection control practices, equipment usage, and overall workflow efficiency. By analyzing the details, we identify areas of success to celebrate and uncover opportunities to enhance the effectiveness of your EVS operations. Keeping the assessment positive instead of punitive helps teams to build on their strengths.

Unlock the power of ProSights™

With our 4-step EVS assessment program, you can gain a competitive edge by fostering a positive, proactive environment.

Elevate patient satisfaction, improve infection control measures, and boost staff morale with our comprehensive approach.

Contact us today and embark on a transformative journey towards excellence in healthcare EVS.

Step Three Reporting results, empowering change

3

Transparency is paramount in our assessment program. After completing the evaluation, we compile a report presenting the findings of the assessment.

This detailed document showcases the strengths and opportunities of your EVS team, highlighting any specific areas determined in Step One. Our team delivers the report in an accessible and actionable format, enabling you to make informed decisions and drive positive change within your facility.

Step Four Creating a roadmap for excellence

4

Using the personalized assessment report, our experts collaborate with you to develop a tailored improvement plan.

We work closely to prioritize any goals for improvement, design targeted strategies, and help implement effective solutions. Our goal is to enhance the overall quality of your EVS program, boost efficiency, and promote a safe and healthy environment for all. To ensure continuous progress, we provide ongoing support and can help track any improvement initiatives, enabling you to leverage our partnership for ongoing success.
