

# Cellulose/Polyester blend flat mop heads

## Hydroentangled cellulose/polyester with synthetic core

The QuickTask mopping range consists of a variety of flat mop heads that can be easily attached to a choice of flat mop head frames and handle assemblies.

QuickTask TASK0500 and TASK0550 are constructed from hydroentangled cellulose /polyester nonwoven fabric with a synthetic fibrefill core. This provides a highly sorbent mop which is suitable for the removal of light soil, residues and biofilms.

Designed to be cost effective for single use, the mop heads are compatible with a wide range of chemicals and disinfectants, including chlorine solutions. The sterile version is gamma irradiated and validated sterile to a 10<sup>-6</sup> SAL.

The heads are compatible with the QuickTask Magnetic Mop Head Frames 2906 and 2699, and the QuickTask Polypropylene Mop Frame 2740.
